***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method of inventory monitoring, classified in class 705, subclass 22.
- II. Claims 16-34, 36 drawn to a communication system, classified in class 356, subclass 36.
- III. Claim 35, drawn to a memory medium, classified in class 369, subclass 30.81.

The inventions are distinct, each from the other because:

Inventions I and II,III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as method of determining whether a driver of a motor vehicle is driving a stolen car by scanning the license plate. See MPEP § 806.05(d).

Inventions I,III and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a rental car return unit identifying the car by license plate and logging it in as returned. See MPEP § 806.05(d).

utility such as a medium on which music is recorded and played. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
